NURSING EXCELLENCE+
QUALITY & INNOVATION

APRIL 24-26, 2019
ORLANDO, FL

GAYLORD PALMS RESORT
AND CONVENTION CENTER

DIGITAL PROGRAM

The Power of Two. In One Incredible Event.
**Virtual Presentations**

**LOCATION: Conference Mobile App**

**V901.1**  A Tale of 2 Service Lines: Pressure Injury Reduction

**TRACK: Clinical Practice**
The initiative was to standardize pressure injury prevention strategies in 2 service lines with an overarching aim of reducing patient harm metrics in this domain from one fiscal year to the next.

**Presenters:** Samantha Ann K Davis, MSN, RN-BC, NE-BC, and Kristen C Foulk, MSN, RN, PCCN, NE-BC.

Christiania Care Health System, Newark, DE

**V901.2**  Increasing Equitable Access to Kidney Transplantation

**TRACK: Clinical Practice**
Transplant improvement initiatives centered on increasing shared decision making, health literacy and health system navigation to increase equitable access to transplant and improve post-transplant outcomes.

**Presenters:** Katherine A Mungur, MSN, RN, CNL, and Barbara R Groene, BSN, RN.

The Christ Hospital Health Network, Cincinnati, OH

**V901.3**  Engaging Pre-Hospital Providers in Coordination of Septic Patient

**TRACK: Clinical Practice**
Pre-hospital provider educational program to increase identification and early intervention for patients at risk for sepsis. Coordination of communications between in-field paramedics and nursing staff in the emergency department to optimize early sepsis care protocol compliance.

**Presenters:** Brian S Draiss, BSN, RN, CEN, EMT, and Rosa Kovach, BSN, RN.

Cleveland Clinic Medina Hospital, Medina, OH

**V901.4**  Using an ERAS Protocol in Bariatric Surgery Patients

**TRACK: Clinical Practice**
Bariatric surgery has been linked with an extensive postoperative length of stay and significant opiod utilization. Our institution’s goal was to implement an ERAS protocol to decrease length of stay after bariatric surgery and combat the opioid epidemic by decreasing the overall use of opioids.

**Presenters:** Melissa H Bowen, MSN, SCRN, and Liliya Bilenko, BSN, CRRN.

Einstein Healthcare Network, Philadelphia, PA

**V902.1**  The Patient’s Voice: Engaging Adolescents In Their Hospital Care

**TRACK: Research**
Adolescents are seldom included in their perception of quality of care during hospitalization. Following an extensive literature review, this adolescent hospital quality of care scale (AHQOCS) was developed from themes deemed important to adolescents.

**Presenter:** Dr. Valerie Lapp, PhD, RN, NEA-BC, CPN.

Orlando Health (Arnold Palmer Medical Center), Orlando, FL

**V902.2**  Adult Inpatient Sepsis Screening

**TRACK: Clinical Practice**
This presentation will review the nursing processes to implement a standardized sepsis screening protocol in adult medical surgical inpatients. Process and outcome measures (mortality rates) will be discussed.

**Presenters:** Mary Ann Francisco, MSN, APN, AGCNS-BC, CCRN-K, and William J Marsack, MS, CMSRN, Center for Nursing Professional Practice and Research, University of Chicago Medicine, Chicago, IL

**V902.3**  Hospital Acquired C. diff is a Battle We Can Win

**TRACK: Clinical Practice**
In recent years, Clostridium difficile has become one of the most common cause of hospital associated infections. Learn how appropriate patient selection led to zero hospital acquired infections on two units.

**Presenter:** Breanna Garrett, MSN, RN, AMITA Medical Center Hinsdale, Hinsdale, IL

**V902.4**  Effectiveness of Senokot, Prune and Lemon Juices on Constipation

**TRACK: Clinical Practice**
Major orthopedic surgery places patients at risk for postoperative constipation. Clinical nursing staff designed a study to investigate the effectiveness of a “cocktail” of prune juice, lemon juice, and senokot in alleviating postoperative constipation.

**Presenters:** Jennifer Withall, MS, RN, ACNS, ONC, and Liliya Bilenko, BSN, CRRN, and Angela Yeung, MSN, NP-C.

NYU Langone Orthopedic Hospital, New York, NY

**V903.1**  Quality Improvement out of Crisis

**TRACK: Clinical Practice**
In September 2017, Hurricane Maria ravaged the island of Puerto Rico leaving death and destruction. Consequently, a large manufacturer of intravenous fluids was affected, causing a massive shortage in intravenous diluents. A large urban, critical access hospital mobilized to implement a conservation strategy without compromising patient care and outcomes.

**Presenters:** Beth Hurwitz, MSN, RN, CEN, AGCNS, and Steven Chapman, MBA, MS, BSN, RN.

Einstein Healthcare Network, Philadelphia, PA

**V903.2**  Journey to Nursing Performance Measures in Ambulatory Care

**TRACK: Clinical Practice**
Ambulatory care nursing will continue to evolve as focus shifts away from acute episodic care and toward population health.

We engaged nurse leaders to develop performance measures for a data registry tool to promote best practice, demonstrate the value of nursing, and support ambulatory facilities on the Magnet journey.

**Presenters:** Harriet Udin Aronow, PhD, NA, Nursing Research and Development, Cedars-Sinai Medical Center, Los Angeles, CA, and Diane Storer Brown, PhD, RN, FNAHQ, FAAN, Kaiser Permanente Northern California, Oakland, CA

V903.3 Reimagining the Stork: The Birth of a Maternal Transport Service

TRACK: Clinical Practice

Children’s Mercy's obstetric and critical care transport departments collaborated to develop an innovative maternal transport service line meeting the needs of both urban and rural regional populations. This presentation describes the combined leadership model, educational strategies, logistic challenges and outcomes experienced in the planning stages and first year of operation.

Presenter: Heather Scronut, MBA, MSN, RNC-OB, CEFM,
Children’s Mercy Critical Care Transport, Kansas City, KS

V903.4 Using Breastfeeding Champions to Increase Breast Feeding

TRACK: Research

Knowledge tapers over time so periodic in-service are essential for nurses to be equipped and competent to meet clients’ needs and institutional goals. This project involved the use of refresher class to equip nurses to support breastfeeding mothers with resulting increase in nurses’ knowledge level and in exclusive breastfeeding rate.

Presenter: Comfort N Obi, DNP, MBA, PGDE, RN, NE-BC,
Clayton State University, Morrow, GA

V904.1 Resource Nurse Position in a Neonatal Intensive Care Unit

TRACK: Professional Development

You will learn how implementation of a dedicated resource nurse position in a NICU improved novice nurses successful transition to independent practice.

Presenters: Diane Shimborse, BSN, RNC, NIC, and Patricia Macho, PhD, RNC-NIC,
Cohen Children’s Medical Center, Nanuet, NY

V904.2 The Journey of a lifetime: From Apathy to Engaged!

TRACK: Shared Decision-Making & Leadership

After concern was voiced regarding the level of engagement of the advanced practice nurses, a small group of APRNs became Pathway to Excellence Champions. Follow their journey as they successfully socialized the Pathway to Excellence Standards in an innovative, inspiring and collaborative manner.

Presenters: Dr. Janice C. Lankford, DNP, RN, CNM, and Dr. Janet Sumner, PhD, RN, CPNP,
Parkland Health & Hospital System, Dallas, TX

V904.3 SAFETY STOP Process Empowers Nurses to SPEAK UP for Patient Safety

TRACK: Safety & Quality

A SAFETY STOP process was created by leaders as a call to action to prevent unsafe situations that could cause harm to patients. A SAFETY STOP is called through the emergency alert system and provides immediate and comprehensive response to a serious patient safety event by a team of responders.

Presenters: Dawn E Holdt, BSN, RNC, CPQM, and Serafin Snare, MSN, CCRN, CNRN, SCRN, and Dr. Kimberly D Hall, DNP, AGCNs-BC, Peace Health, Springfield, OR

V904.4 Engaging Safety on an Adolescent Inpatient Psychiatric Unit

TRACK: Safety & Quality

Nurses are responsible for maintaining the safety of patients in psychiatric hospitals through milieu management and the use of evidence based practices. Nursing engagement with patients can lead to a decreased number of adverse safety events and hours of one to one observation.

Presenter: Jaime Lovelace, BSN, RN-BC,
The Menninger Clinic, Houston, TX

V905.1 Fall Prevention Deserves Your Attention

TRACK: Safety & Quality

Falls can occur anywhere and at any time. Come learn how a multidisciplinary team approach provided empowerment and increased communication between staff to inspire initiatives to facilitate preventing falls and improve patient safety.

Presenters: Jennifer E Stone, ADN, RN, and Shannon N Kelly-Hill, MSN, RN,
Roper Saint Francis Mount Pleasant Hospital, Mount Pleasant, SC

V905.2 Lean Tissue Trauma Rounding & Prevention System Redesign

TRACK: Safety & Quality

Target facility acquired pressure injuries. Nursing personnel at a 120 bed facility located in Pennsylvania obtained their wound care certification to act as an impetus for change. The quality initiative focused on preventing pressure injuries as well as eliminating the 8 wastes of lean during the weekly rounding process.

Presenters: Theodore H Clay, MSN, RN, and Mark D Nix, MBA, BSN, WCC, CCRN,
Coatesville VA Medical Center, Coatesville, PA

V905.3 Midlines: A Move in a New Direction

TRACK: Safety & Quality

As all healthcare systems struggle with Central Line Associated Bloodstream Infections (CLABIs), our hospital engaged direct care nurses to become involved by being trained in the insertion of midlines. This initiative has helped to empower our nursing staff at the bedside and reduce the number of CLABIs for our hospital.

Presenters: Jennifer Cole, MSN, RN-BC, and Reena Joseph, MSN, CCRN, Houston Methodist St. Catherine, Katy, TX

V905.4 Cultivating Interprofessional Partnerships

TRACK: Shared Decision-Making & Leadership

This session will present one large academic medical center's multifaceted approach to improved communication and conflict resolution between APRNs, MDs and nurses with the expected goal of a collaborative environment that fosters improved evidenced-based, patient centered care and satisfaction.

Presenters: Penny Leatherwood, BSN, RN, CNM, and Karen Zelman, MSN, RN, CNM,
Parkland Health and Hospital System, Dallas, TX

<tr>
<th>Session</th>
<th>Title</th>
<th>Track</th>
<th>Content Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td>V906.1</td>
<td>Zero Tolerance: Creating Safer Patient-Nurse Interactions</td>
<td>Safety &amp; Quality</td>
<td>While aggressive patient-nurse encounters continue to intensify, de-escalation programs have been shown to increase the safety of those encounters. One large academic medical center created and implemented a robust Behavioral Emergency Response Team (BERT) program to effectively address this phenomenon. The structure and findings of this program are discussed. Presenters: Laura C Adams, MSN, RN, and Scott S. Christensen, DNP, MBA, APRN, ACNP-BC, University of Utah Health, Salt Lake City, UT</td>
</tr>
<tr>
<td>V906.2</td>
<td>Implementing Electronic Handoff in the Emergency Department</td>
<td>Safety &amp; Quality</td>
<td>Learn how a large safety net hospital utilized interdepartmental collaboration and state of the art technology to establish an electronic handoff process and tool for patients transferring from the Emergency Department to Inpatient units. The tool significantly decreased delays, promoted patient safety, and improved nursing communication throughout the organization. Presenters: Erin E Pittman, BSN, RN, CEN, CSSYB, and Meghan Moore, BSN, RN, CEN, CSSYB, Parkland Hospital, Dallas, TX</td>
</tr>
<tr>
<td>V906.3</td>
<td>Utilizing Philosophy of Sport Leaders to Improve Nursing Leadership</td>
<td>Shared Decision-Making &amp; Leadership</td>
<td>The great leaders in sport share similar leadership philosophies that can translate to healthcare. This program analyzes interviews and experiences with National Championship coaches to encourage improvement in nurse leadership. Learn how to gain trust, promote passion and utilize shared-decision making to create a culture of nursing excellence. Presenter: Jamie R Kanehl, MSN, RN, Duke University School of Nursing, Durham, NC</td>
</tr>
<tr>
<td>V906.4</td>
<td>Obtaining the Gold Using the Baptist Health Mentorship Model</td>
<td>Shared Decision-Making &amp; Leadership</td>
<td>Sustaining a positive practice environment is essential to promote empowerment and engagement of direct care nurses and interdisciplinary staff, minimize nurse manager burnout and reduce overall nurse turnover rates. Gain insight regarding how the Baptist Health Mentorship Model can be utilized to support organizational teams along the Pathway journey. Presenter: Dr. C. Preston Lewis, DNP, MSN, RN, CCRN, Baptist Health Lexington, Lexington, KY</td>
